

ORIGINAL VERSION:

For the last 13 years, (after having my first baby and reading about the best foods to feed him) I became really aware of the importance of what we put into our bodies. My wellness journey began! Since then, I have tried so many different things and met with doctors, gurus, specialists, in pursuit of living my healthiest and most balanced life— from oversized supplements that are difficult to swallow to gummy vitamins that were ok on taste but not so good on ingredients, and I learned so much along the way! None of this made sense to me. Why can't it be yummy and be good for you?

Lemme tell you, it can!

Meet Lemme - My new line of vitamin and botanical supplements I've created to become a divine part of your everyday life.

Over the last 5 years, I went on a mission to collaborate with doctors and scientists to create gummy vitamins and supplements that use clinically-backed ingredients and formulations that help you live your best life. The twist? I made them so delicious you won't believe they're this good for you.

COPYWRITTEN VERSION:

I didn't pay much attention,
until my first baby.

The lack of awareness of the importance of daily vitamins and supplements was our reality. Companies claimed life-changing results from 1 HUGE pill you had to force down everyday, or a plain tasting gummy that had suspicious ingredients.

I met with doctors, gurus, specialists, etc to try to find my most balanced self.
It seemed impossible.

For the last 13 years, I've been discovering a new path to finally provide the product that fits all.

That's where Lemme comes in.

We don't have to sacrifice good taste for good ingredients-
Lemme help you become your most divine self!

I've developed Lemme for over 5 years by going on missions and collaborating with doctors and scientists.

The catch? There is none! But they taste so delicious you won't believe how good they are for you too!
